SUMMARY

Software Engineer with 3+ years building production microservices, scalable REST APIs, and SQL databases at scale. Strong fullstack experience across React, Spring Boot, and cloud-native AWS with hands-on AI/ML integration (RAG, multi-agent systems).

EDUCATION

Arizona State University, *M.S. in Computer Science (GPA: 4.00)* — Jan 2024 – Dec 2025

Indian Institute of Technology (IIT) Mandi, *B.Tech in Computer Science* — Jul 2017 – May 2021

WORK EXPERIENCE

Arizona State University – Global Futures Laboratory — Feb 2026 – Present
Software Engineer, AI — Tempe, AZ

- Built a **multi-agent AI system** synthesizing 100+ DOE research papers for MARVEL nuclear microreactor readiness assessment.
- Developed a RAG pipeline with **PostgreSQL** persistence and vector embeddings to extract insights from raw research papers.
- Leveraged LangGraph, LangChain, and prompt engineering, cutting manual analysis by **40%**, saving **10+ hrs/week**.

Topline Co. Ltd. — Oct 2020 – Nov 2023
Software Engineer — Saitama, Japan

- **Led** modernization of a legacy **PHP CRM** monolith to **React and Spring Boot** microservices managing **1M+** telecom client records.
- Secured exposed **REST APIs** with Role-Based Access Control, OAuth2/JWT, and AES-256 encryption behind an **API gateway**.
- Identified a critical database bottleneck in customer search and implemented **Redis caching**, cutting P90 latency from **400ms to 50ms**.
- Built **React** UIs with **Material UI** and react-i18n (EN/JP) for customer search, ticketing, and lead tracking, cutting page load by **67%**.
- Replaced batch reports with **Kafka** event streaming, enabling real-time agent dashboards for call resolution and conversion metrics.
- Set up **CI/CD pipelines** with **GitHub Actions** for independently deployable services, reducing deployment time by **64%**.
- Drove team-wide testing initiatives in Agile sprints using **JUnit and Jest**, increasing code coverage from **43% to 88%**.

Topline Co. Ltd. — Jun 2020 – Aug 2020
Software Engineering Intern — Saitama, Japan

- Developed a **real-time call analytics platform** (Flask + Google Speech-to-Text) processing **100+ calls/day** for telecom agents.
- Automated end-to-end transcription, translation, and sentiment analysis to improve call handling for **cross-functional** teams.
- Delivered **NLP-powered dashboards** reducing feedback cycle time by **33%**, refined through code reviews with senior engineers.

PROJECTS

AutoCRM: AI Ticket Resolution System (Live Demo) — 2025

- Architected a **multi-agent system** (LangGraph, MCP) that autonomously resolves support tickets with a **90%** resolution rate.
- Designed **Human-in-the-Loop** approval workflows with guardrails for high-risk actions using Pydantic-validated tool schemas.

ReadEaseAI: Inclusive Reading Platform (Live Demo) | *Claude Builder Club Hackathon* — 2025

- Developed a **Next.js + TypeScript** platform with 4 reading modes for dyslexia, ADHD, autism, and visual impairment users.
- Integrated voice-controlled document Q&A for blind users via **Web Speech API** with conversation memory.

Multimodal Movie & Music Discovery Platform (Live Demo) — 2025

- Shipped a **full stack web app** (React, Next.js, AWS Lambda) for personalized movie and music discovery with semantic search.
- Built a data pipeline to fine-tune a CNN classifier on **6k+ audio tracks** via PANNs transfer learning, achieving **95% accuracy**.

Distributed Face Recognition System on AWS — 2024

- Designed a real-time video pipeline on **AWS** (EC2, Lambda, S3, SQS) with Docker/ECR autoscaling, achieving 98% accuracy.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, Bash, C/C++, HTML/CSS, Go, Rust
Frontend: React, Next.js, Angular, Redux, Tailwind CSS, GraphQL, WebSockets, REST APIs, Jest, Webpack
Backend: Spring Boot, Node.js, Express.js, FastAPI, PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ, Elasticsearch, Pinecone
AI/ML: LangChain, LangGraph, RAG, AI Agents, MCP, OpenAI API, Hugging Face, PyTorch, TensorFlow, Pandas
Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, Terraform, CI/CD, Git, Prometheus, Grafana, Jenkins, Linux, Jira
Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, System Design, Distributed Systems, Scrum, HTTP

CERTIFICATIONS

AWS Certified Developer – Associate (DVA-C02) **(View Credential)** — 2025
Amazon Web Services (AWS)
